GAS Distribution

TAQA Gas is TAQA Arabia's natural gas distribution platform, operating distribution concessions and overseeing all downstream activities, from surveys to engineering, procurement, construction works, O&M, billing and collections. TAQA Gas scope of services covers 49 Egyptian cities in 8 governorates (Suez, Red Sea, Damietta, Kafr El-Shiekh, Benisuif, Minya, Asyut, New Valley and Toschka).

TAQA Gas transmits and distributes natural gas to more than 1.6 million contracted residential customers, 8,000 commercial customers, 365 industrial customers, 5 major power stations and

85 NGV stations as well as 94 touristic facilities, distributing more than 7.5 BCM of natural gas annually with an existing distribution capacities of more than 11.8 BCM/year. TAQA Gas connects 150,000 customers yearly to the national gas grid as part of the government's ambitious plan to expand the usage of natural gas to residential customers.

With a long track record and experience throughout the region, TAQA Gas has successfully completed several projects in Qatar, UAE, Libya and is using its expertise and know-how to expand its scope of work to reach the Sub-Saharan African continent.

Engineering, Procurement & Constructions

Our Engineering Scope is specialized in detailed designing, engineering and construction works of gas distribution networks including pressure reduction, metering stations, civil and electromechanical works needed for natural gas supply. TAQA has an excellent track record connecting Egypt's industrial and commercial clients as well as fabricating pressure reduction stations to serve clients within and outside TAQA's concessions.

Our Engineering scope encompasses the study of the supplied areas, design / analysis of natural gas and other utilities networks; detailed determination of pipe network diameters and project costs;

TAQA 
Power

POWER

TAQA Power, TAQA Arabia's power distribution platform provides the full scope of services including development, construction, operation, maintenance, billing & collection, energy efficiency of conventional & renewable power generation & distribution projects serving a wide range of clients for the oil & gas, industrial, residential, commercial, agricultural & tourism sectors across the country.

Our successful track record includes developing more than 150 MW of conventional power generation projects, 1300 MVA Power distribution projects, in addition to 105 MW Solar PV generation projects.

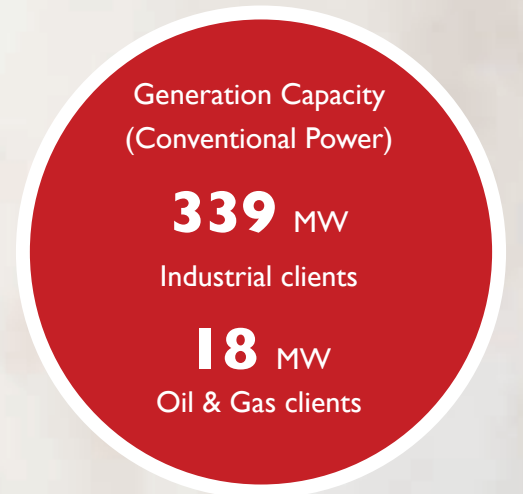

TAQA Power's diversified list of clients, spread from real estate projects in Cairo including Emaar, Cairo Festival City, Bourouj, Mall of Arabia,

One Ninety and other significant residential and commercial customers to major industrial zones including Al Motawereen in 6th October and other industrial zones in 10th of Ramadan industrial area. TAQA Power is also the first private sector company licensed for electricity distribution in Egypt, since its debut in South Sinai in 2000.

TAQA Volt

TAQA Volt is TAQA Power's Electric vehicles charging service company, specialized in designing, installing, operating, and selling electricity for EV Charging stations network all over Egypt, to be accessible and convenient for all EV users. TAQA Volt also provides the full design for the EV Charging station technically and commercially.

TAQA Volt has already installed several EV charging station in different location and has an ambitious plan to increase its EV charging stations to reach 50 stations by 2023.

RENEWABLE ENERGY

As part of TAQA Arabia’s vision to shift towards a cleaner energy and sustainable environment, TAQA Power has been very keen to penetrate the renewable energy market through its two companies TAQA Solar and TAQA PV.

TAQA Solar has been the first 100% Egyptian company to finalize a 65MW PV solar power plant in Benban (Aswan), one of the biggest PV solar parks in the world. The project is under the Egyptian government’s feed-in tariff program and started commercial operation in Feb 2019.

TAQA Power also established TAQA PV that offers unique tailored solutions and flexible financing options to clients looking for a more sustainable, reliable, and efficient source of energy. TAQA PV has already been able to gain the confidence of several clients

among different sectors including agricultural developers such as “Dina Farms (6MW)” in a cooperation with the European Bank for Reconstruction and Development (EBRD) with a total project cost of US \$42 million, in addition to other industrial and touristic developers such as Somabay (5MW PV), aiming to generate renewable energy in order to minimize its dependency on conventional electricity while minimizing its carbon footprint. In 2022 TAQA Arabia launched the largest solar power plant in Sharm El-Sheikh (20 MW) in Nabq Bay, built in a record time not exceeding 4 months, the power plant produces more than 42 GWh/year of clean energy.

WATER

TAQA Water is TAQA Arabia's water platform with expertise exceeding 15 years in the water treatment field based on a very well-established team.

TAQA Water invests, designs, constructs, automates, installs, operates & maintains reliable, cost-effective & smart water solution systems with a wide range of contractual models. Our services include Filtration, Desalination, Chemical treatment, and Wastewater treatment.

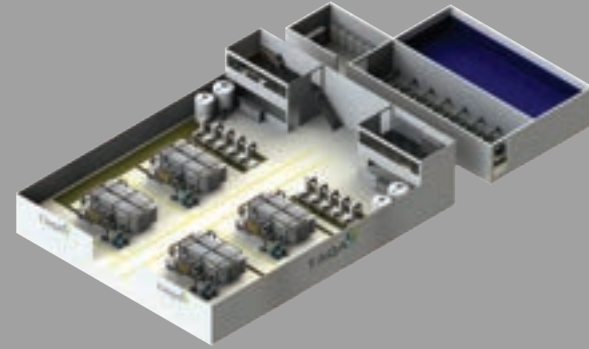

TAQA Water serves a wide spectrum water consuming sectors; TAQA Water offers smart, customized, ECO-water treatment solutions using the

latest energy saving technology for the industrial, agricultural, touristic & real estate sectors.

Contributing in our country's green transformation, TAQA Water is now developing the 1st ECO green water desalination plant in Egypt that besides adopting the most innovative energy saving equipment, also relies on integrating our renewable energy resources to produce desalinated water using energy generated from solar systems. Tentatively, this plant shall serve more than 5000 people in Red Sea Governorate & will help reduce carbon emission by 5.5 tons/day.
